Call for Participation

We would like to invite you to participate in the first **Smart Devices Security and Privacy Contest**.

The contest aims at shedding the light on important issues facing the use of smart devices particularly in the smart government initiative as part of the UAE vision 2021 and Abu Dhabi vision 2030. It also aims at identifying bright minds that would excel in information and cyber security. In addition, the competition will serve as a promotion and awareness vehicle for smart device security and information security in general. It is a great opportunity for professionals/students that are working/majoring in the domain of information security and related subjects to measure their skills in smart device security, and to acquire valuable experience.

For this year, the contest will concentrate on developing an innovative hardware/software solution that will be able to **prevent the use of smart device cameras in certain sensitive events and/or areas**. Such solutions must be able to control smart devices camera independent from their platform (IOS, Android, BlackBerry, and Windows). Participants can come up with the required security setup to secure such areas/events without physically taking attendees' smart devices. Moreover, wireless jamming is not allowed. The main target here is to control only the camera without disabling other services such as phone calls and SMS.

Get Awarded:

	First	Second	Third
School Students	30,000 AED	20,000 AED	10,000 AED
University Students/Professionals	100,000 AED	60,000 AED	30,000AED
